

Project 13782EZ: Pine Desk Organizer

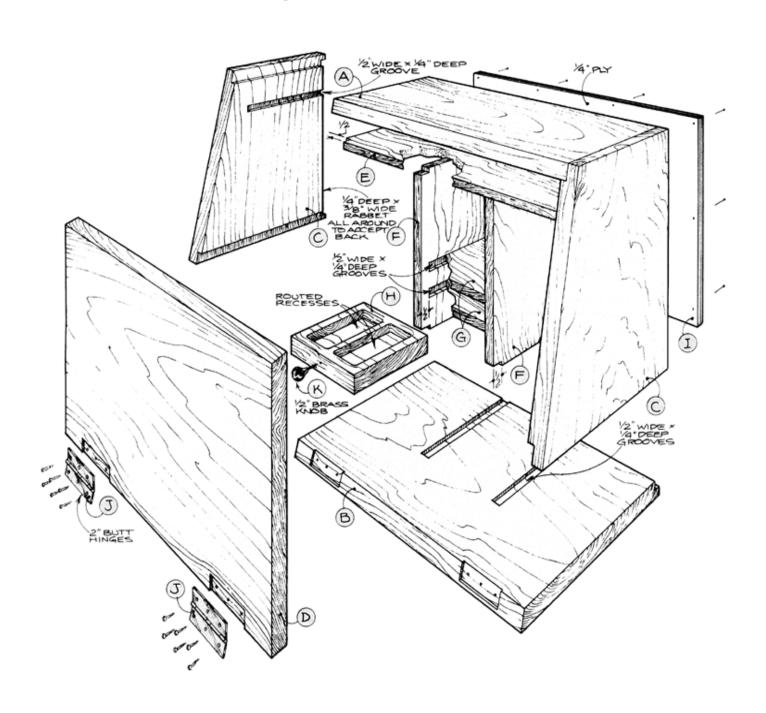

We have seen desk organizers in a number of gift catalogs, and they seem to be quite popular. The organizer is easily moved about, and it holds notepaper, envelopes, and has a handy little drawer for paper clips and stamps.

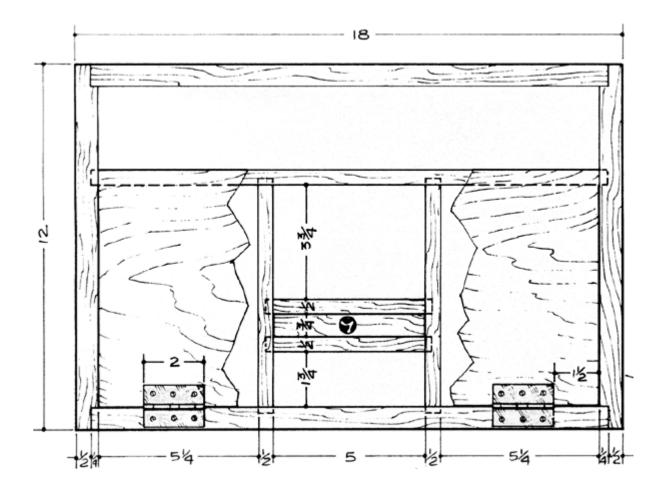

Our organizer, which is crafted in pine, is designed so that the major parts can be cut from commonly available 1×6 and 1×10 pine boards, which typically measure 3/4" thick $\times 5-1/2$ " and 9-1/4" wide, respectively.

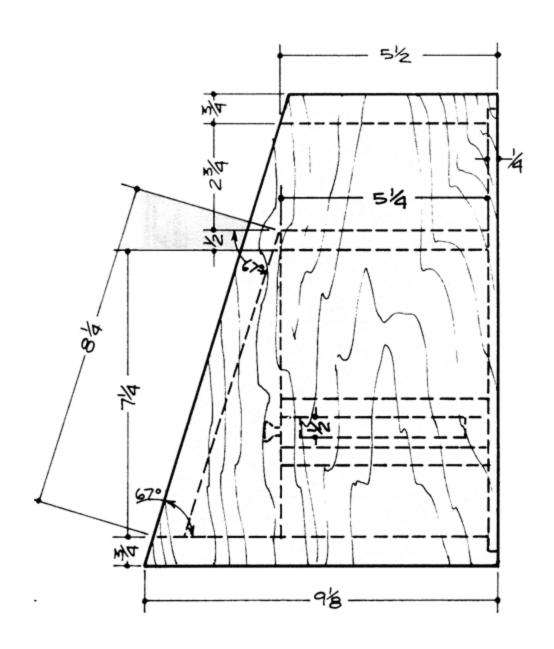

Pine Desk Organizer Materials List

Part	Description	Size	No. Req'd	
Α	Тор	3/4" x 5-1/2" x 17"	1	
В	Bottom	3/4" x 9-1/8" x 17"	1	
С	Sides	3/4" x 9-1/8" x 12"	2	
D	Front	3/4" x 8-1/4" x 16-1/2"	1	
Е	Top Shelf	1/2" x 5-1/4" x 17"	1	
F	Vertical Partition	1/2" x 5-1/4" x 7-3/4"	2	
G	Center Shelf	1/2" x 5-1/4" x 5-1/2"	2	
Н	Drawer	3/4" x 5-1/4" x 5"	1	
1	Back	1/4" x 11-1/4" x 17-1/4"	1	
J	Hinges	2" butt hinges	1 pr.	
K	Knob	1/2" diameter	1	

Pine Desk Organizer Complete Schematic

Pine Desk Organizer Step-by-Step Instructions

- 1. Select 1 x 6 stock to make the top (A) and the drawer (H).
- 2. Select 1 x 10 stock to make the bottom (B), sides (C), and front (D).
- 3. Select 1 x 6 stock to make the top shelf (E), partitions (F), and center shelves (G).
- 4. Resaw the 1 x 6 stock for parts E, F, and G to obtain the 1/4" thickness these pieces require.
- 5. Select a piece of 1/4" thick plywood to make the back (I).
- 6. Cut all parts to length and width.
- 7. Use the table saw to establish the 67-degree angles on the front edge of the top and bottom, and on the upper and lower edges of the front.
- 8. Rabbet the sides to accept the top and bottom.
- 9. Use the tapering jig to taper the sides.
- 10. Equip the router with a 1/2" rabbeting bit to cut the simple stopped groove system for mounting shelves and partitions in the carcass.
- 11. Cut the 1/4" deep x 1/2" wide grooves in the sides to accept the bottom and top.
- 12. Cut the 1/4" deep x 1/2" wide grooves in the bottom to accept the partitions.
- 13. Cut the 1/4" deep x 1/2" wide grooves in the top shelf to accept the partitions.
- 14. Use a chisel to square all groove ends.
- 15. Select a 3/4" thick section of board to make the drawer.
- 16. **NOTE** the grain direction of the drawer so that you can avoid problems with wood movement due to changes in humidity.
- 17. Rout the drawer compartments.
- 18. Reinforce the four corners with dowels or finishing nails, then glue up, assemble, and clamp the desk carcass.
- 19. Rout around the inside edge of the carcass perimeter to accept the plywood back, squaring the corners with a chisel.
- 20. Slide the shelves and partitions into place.
- 21. Add the back, securing it with brads.
- 22. Mortise the bottom and front to accept the butt hinges.
- 23. Mount the 1/2" diameter knob on the drawer.
- 24. Sand the piece.
- 25. Stain if desired.
- 26. Finish with penetrating oil.

These plans were originally published in Volume 9, Issue 6 of *The Woodworker's Journal* (Nov./Dec. 1985, page 56-57).
