Download FREE woodworking plans for these projects

The following projects were featured in *Popular Woodworking* in the last couple years. In each free plan you get a cutting list, a description of the construction process and a downloadable construction drawing in PDF format.

Byrdcliffe Cabinet

The furniture built by the Byrdcliffe Arts & Crafts Colony in the early 20th century is rare, unusual and expensive. Luckily, it's easy to build at home. [CLICK HERE](#)

Stickley Side Table

The first step to building a Morris chair [CLICK HERE](#)

Pattern Cutting on the Table Saw

With a simple jig, as seen in these free woodworking plans, you can transform your table saw into an accurate pattern-cutting machine. [CLICK HERE](#)

A Contemporary Mobile File Cabinet

Looking for a sleek and contemporary project that helps organize? Just read this free plan to see how easy it can be. [CLICK HERE](#)

Garage Golf Caddy

A weekend in the shop gains you a handy place to store everything you need for golf. [CLICK HERE](#)

Heirloom Photo Album

A special board and some hardware are all you need to make this album. [CLICK HERE](#)

Rough Lumber Cut-off Stand

Cut long lengths of lumber to rough size without four sawhorses or a helper. [CLICK HERE](#)

All-weather Morris Chair

All it takes is \$40 in pine, a saw and a drill to build this outdoor Morris chair. [CLICK HERE](#)

European Telephone Console

Keep your phone, phone books, keys and small umbrellas in order with this fashionable modern console. [CLICK HERE](#)

Router Table-Mate

Make your own router table for less than \$50 by using these woodworking drawings and techniques. This one is easy to make and store. [CLICK HERE](#)

Shaker Bench

This unassuming bench is an excellent lesson in making wedged through-tenons. [CLICK HERE](#)

'Welcome Friends' Plate

This simple scroll-sawn collector's plate will charm visitors to your home. [CLICK HERE](#)

\$175 Workbench

After a lot of figuring I came up with a simple plan: Build a bench for less than \$175. [CLICK HERE](#)

Contemporary Shelves

It's rare that bookshelves look as interesting as the objects you display on them. These shelves are easy to build and knock down for storage. [CLICK HERE](#)

Drill Press Table

Drill presses are designed mostly for metalworking. Dress yours up with this table - we give you all the project plans - and you'll find it indispensable for woodworking, too. [CLICK HERE](#)

'Welcome Friends' Plate

This simple scrollsawn collector's plate will charm visitors to your home, and the design is simple enough that you can make a few of them in a weekend. The plate consists of two pieces that are sawn and then glued on top of one another to create the 3D effect. Choose two contrasting woods for the different layers. I used ¼" mahogany for the top layer and ¼" birch for the bottom layer, though any tight-grained hardwood will do. After you've picked out your wood, sand it to 220 grit. Make two copies of the drawing at right. Cut one pattern for the interior plate design and one for the rim design. Attach them to your wood with rubber cement or a spray adhesive.

Use a small drill bit to bore access holes for all your inside cuts, then make your cuts with your scroll saw. Clean up any rough edges with sandpaper. Glue the two pieces together using the registration marks on the drawing and finish your plate with two coats of a clear finish.

You can hang your plate on the wall or purchase a plate holder to display it on a mantle or a sideboard. Order a wooden plate holder (not the one shown above) for \$1.95 plus shipping by calling the Berry Basket and asking for item# P550. **PW**

Rick Longabaugh is a professional woodworker who runs www.berrybasket.com.
